

Share or export reports and dashboards

Last updated: June 6, 2025

Available with any of the following [subscriptions](#), except where noted:

 [All products and plans](#)

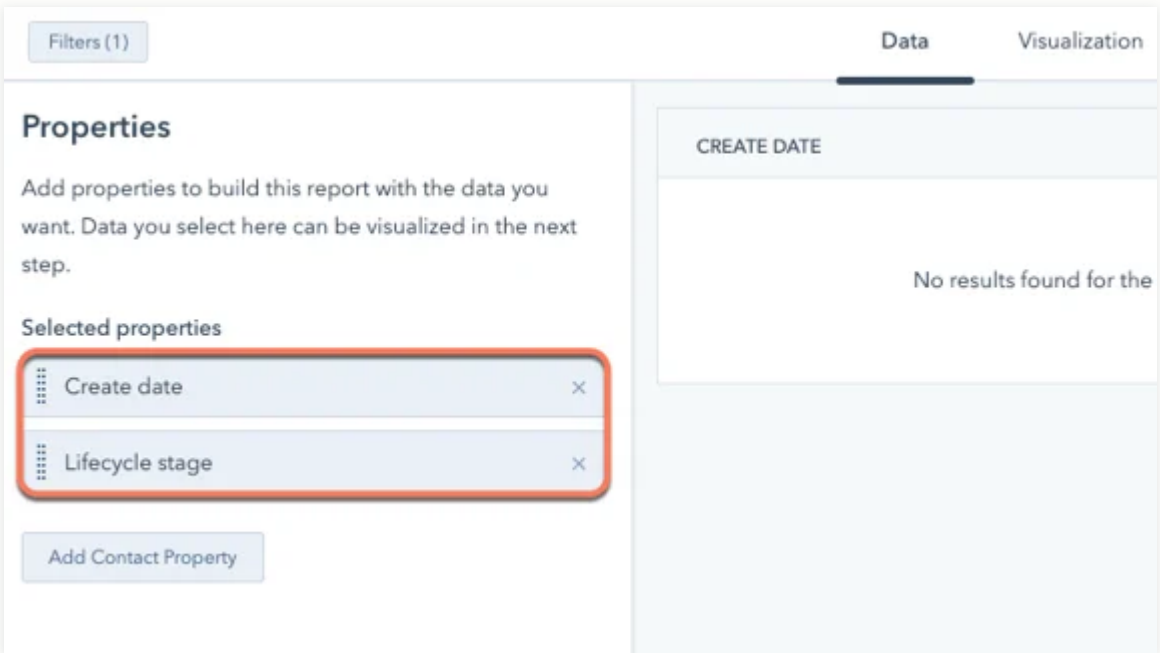

Share **reports and dashboards** with your team. You can share reports and dashboards via email, Slack, and Google Chat once or on a recurring basis depending on the report or dashboard’s configuration.

Share a report

From the reports dashboard, you can export a report as a CSV or Excel file, or email the report to users in the account. You can also schedule recurring report emails on a daily, weekly, or monthly basis. You can set up multiple recurring emails for a single report.

Shared data files will include fields that have been added to the report:

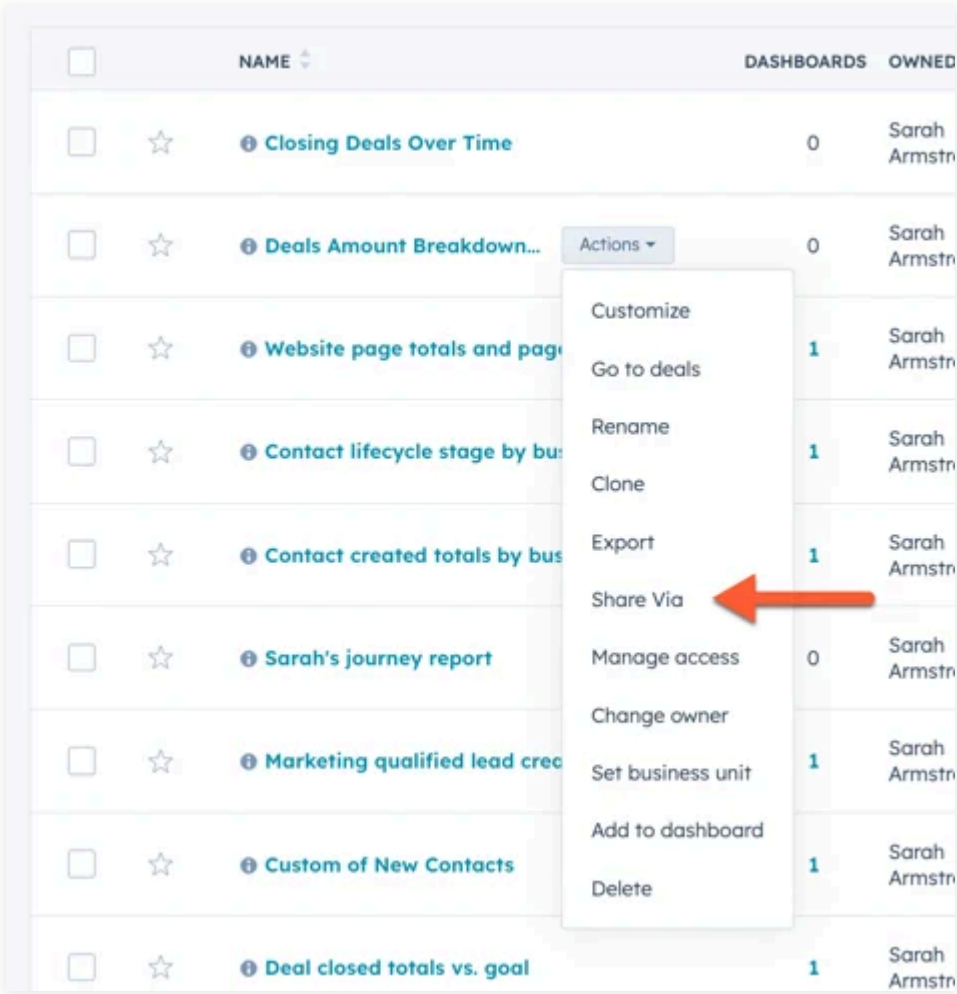

- **Single object reports** will export with properties that have been added to the *Selected properties* section of the *Data* tab of the report builder.

- Advanced **custom reports** will export with fields that have been added to the *Configure* tab of the report builder.

Send and schedule emails for an individual report

1. In your HubSpot account, navigate to **Reporting > Reports**.
2. Hover over the report you want to email, then click **Actions > Share via**.

3. In the right panel, select **Email**. Then, click **Next**.
4. By default, the email will be set to send once. To send a recurring email, in the *Is this a recurring email?* section, select **Yes, this is a recurring email**.

5. Click the **Internal recipients** dropdown menu, then select the users to send the email to.
6. To add a data file to the email, click the **Attach downloadable file** dropdown menu and select a **data type**. If *No attachment* is selected, a visual of the report will be emailed instead of a data file.
7. To send the email to recipients that are non-HubSpot users in your account, enter their **email address** in the *Other recipients* field. Their email addresses must have a **verified domain**.
8. In the *Email subject* field, enter the **email subject line** that'll appear in the recipient's inbox.
9. In the *Message* field, enter the **email body text**.
10. If you've selected to send the email on a recurring schedule:
 - In the *Email nickname* field, enter a **name** for this recurring email. Recipients cannot see this nickname.
 - Click the **Schedule** dropdown menu, then select **Daily**, **Weekly**, or **Monthly**.
 - If you selected *Weekly* or *Monthly*, click the **Day of [Week/Month]** dropdown menu, then select the **days** or **dates** when you want the email to be sent.
 - Click the **Time of day** dropdown menu, then select the **time** that you want the email to send out. Report data will be captured two hours before this time. A summary of the email delivery dates will populate at the bottom of the panel.

11. To preview the report that the recipients will receive in a new tab, click **Preview**.
12. To send the email, click **Send now** or **Schedule email**.

Please note: when sending report data as an attachment to an email the following reports aren't supported; web analytics, reports with email as the data type, annotations, custom reports, reports with unified data type, and sales analytics widget reports.

Export a report

For reports that aren't supported through the **share function**, a once-off email to your user email address can be sent including a data file. This email can't be set as recurring.

1. In your HubSpot account, navigate to **Reporting > Reports**.
2. In the left sidebar menu, under *Analytics suites*, select the **arrow** next to the analytics suite you'd like to export from (e.g. *Marketing*) to expand the category menu.
3. Click the **arrow** next to a category from the suite (e.g. *Web traffic analysis*) to expand the category menu.
4. Select a report (e.g. *Pages*).
5. At the top of the report:
 - Use the **date range** filter to specify your date range.

- Click **All analytics activities** to use a different **view**.
 - Click **Advanced filters** to add additional filters to the report.
6. In the upper right of the report, click **Actions**, then select **Export unsummarized data**.
7. Update the **name** in the *Name* field.
8. Click the **File format** dropdown menu, and select the **file format**.
9. Click **Export**. You'll receive a notification and email when your export is ready.

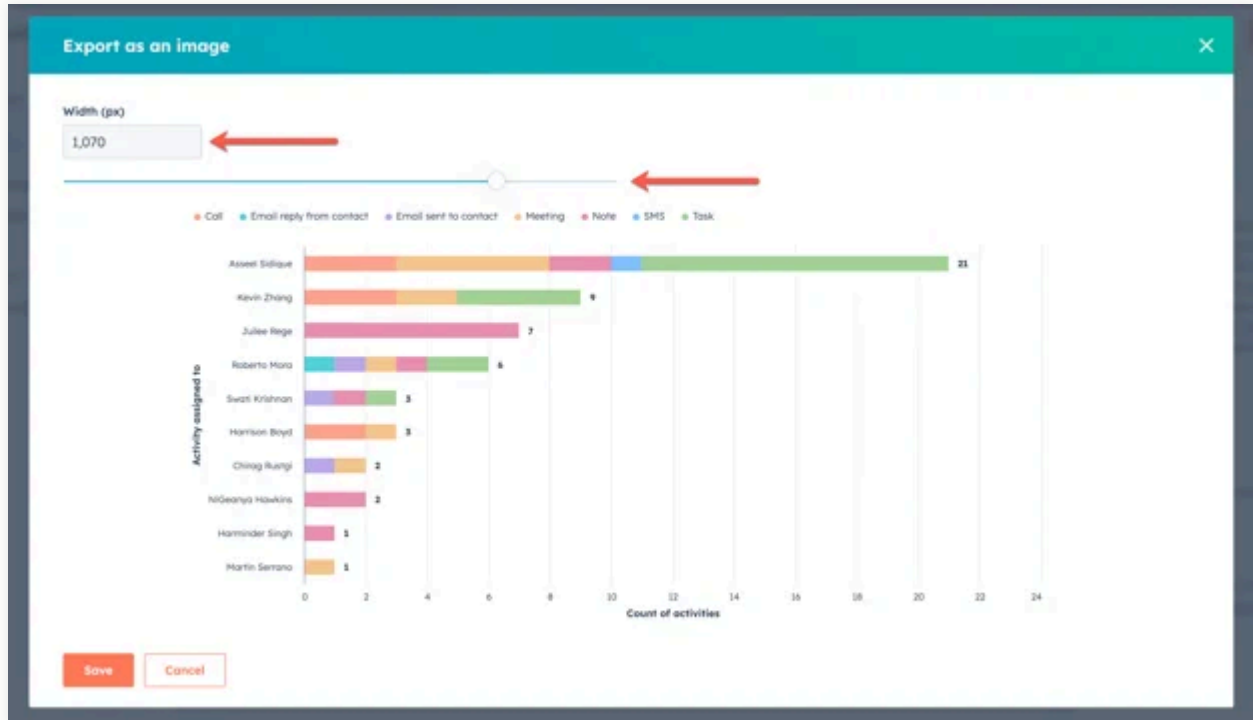

Share a report as an image

You can share a report as an image, and adjust the size to properly scale the report image.

1. In your HubSpot account, navigate to **Reporting > Reports**.
2. Hover over the report you want to export, then click the **Actions** dropdown menu and select **Export as an image**.

3. Adjust the width with the **slide** or a **number** of pixels.

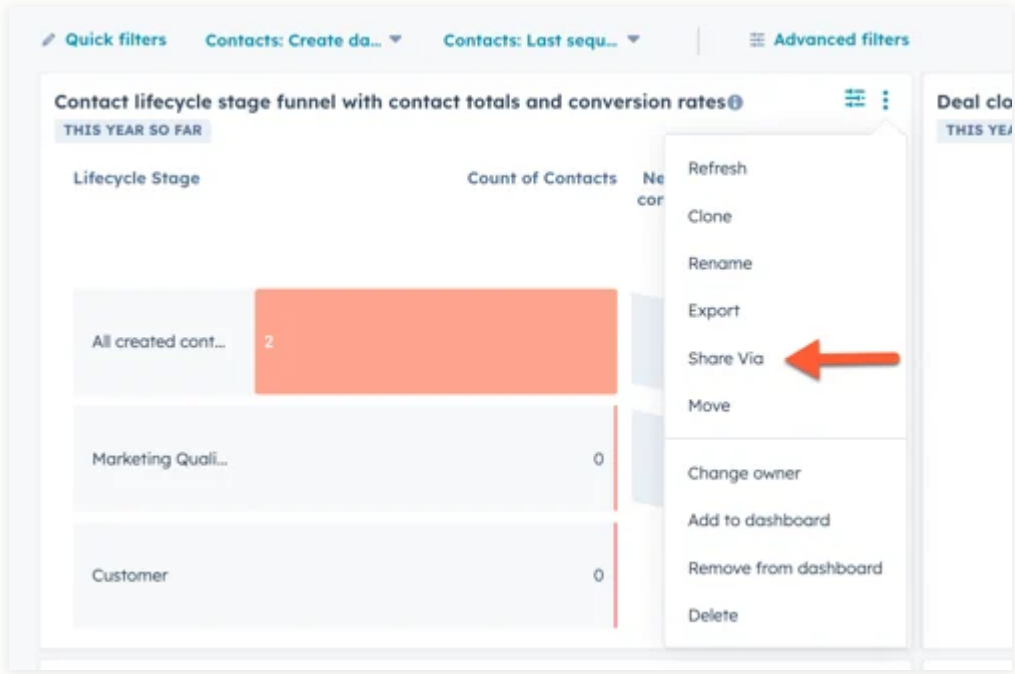

4. Click **Save**. The image will now be downloaded with the correct scale applied.

Share a report from a dashboard

Send an individual report's data from a dashboard to multiple email addresses. Emails can be configured to send recurring.

1. In your HubSpot account, navigate to **Reporting > Dashboards**.
2. In the top right of a report on your dashboard, click **⋮**. Select **Share via**. Then, select **Email**.

3. Select if the email will be recurring. If you select **Yes**:
 - In the *Email nickname* field, enter a **name** for this recurring email. Recipients cannot see this nickname.
 - Click the **Schedule** dropdown menu, then select **Daily**, **Weekly**, or **Monthly**.

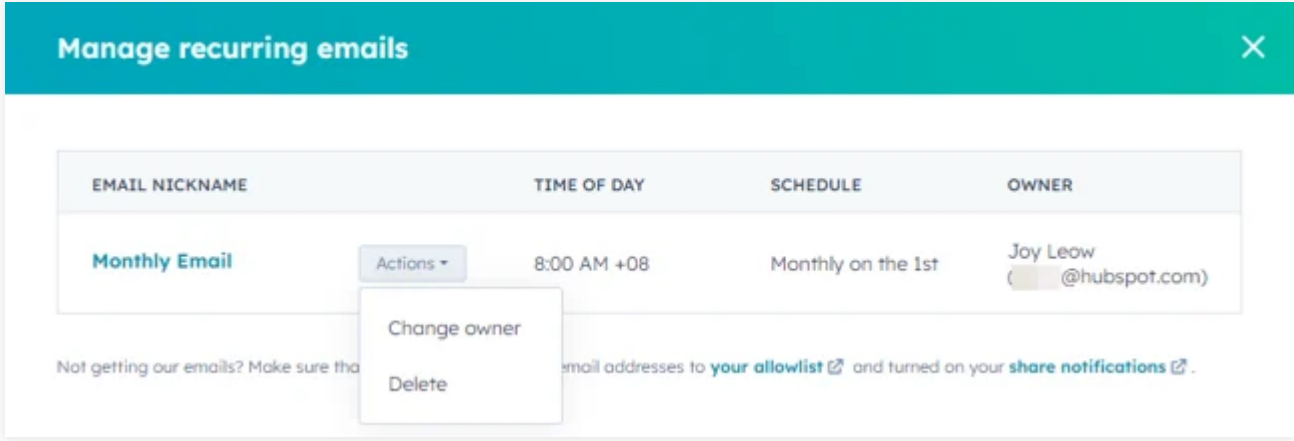

- If you selected *Weekly* or *Monthly*, click the **Day of [Week/Month]** dropdown menu, then select the **days** or when you want the email to send.
 - Click the **Time of day** dropdown menu, then select the **time** that you want the email to send. Report data will be captured two hours before this time.
4. Click the **Recipients** dropdown menu, then select the **users** that you want to send the email to.
5. To include a data file of the report as an email attachment, click the **Attach downloadable file** dropdown menu, then select a **file format**. If *No attachment* is selected, a visual of the report will be emailed instead of a data file.
6. In the *Email subject* field, enter the **subject line** that will appear in the recipient's inbox.
7. In the *Message* field, enter the **email body text**.
8. To finish setting up the email, click **Send now** or **Schedule email**.

Please note: only Single object, Event-based, and Customer journey reports can be sent as CSV, XLS and XLSX by email.

Manage recurring report emails

If you're a **Super Admin** or the owner of a report, you can modify and delete a recurring email.

1. In your HubSpot account, navigate to **Reporting > Reports**.
2. Hover over the report that has a recurring email, then click **Actions > Manage recurring shares**.
3. In the dialog box, manage the recurring email:
- To edit the email details, click the **email nickname**.
 - To change the recurring email owner:
 - Hover over the email, then click **Actions > Change owner**.
 - In the dialog box, click the **Recurring email owner** dropdown menu, then select a new **user**.
 - Click **Change owner**.
 - To delete the recurring email:
 - Hover over the email, then click **Actions > Delete**.
 - In the dialog box, click **Delete recurring email**.

Please note: a recurring email must be deleted at least two hours before it is due to send. If it's deleted within two hours of its send time, the email will be sent to any scheduled recipients.

Share a dashboard

Send an email with a data file of your dashboard reports once or on a recurring basis to your HubSpot users. Dashboard data can be sent to an email address that isn't in your account (*Professional* and *Enterprise* only) on a once-off basis only.

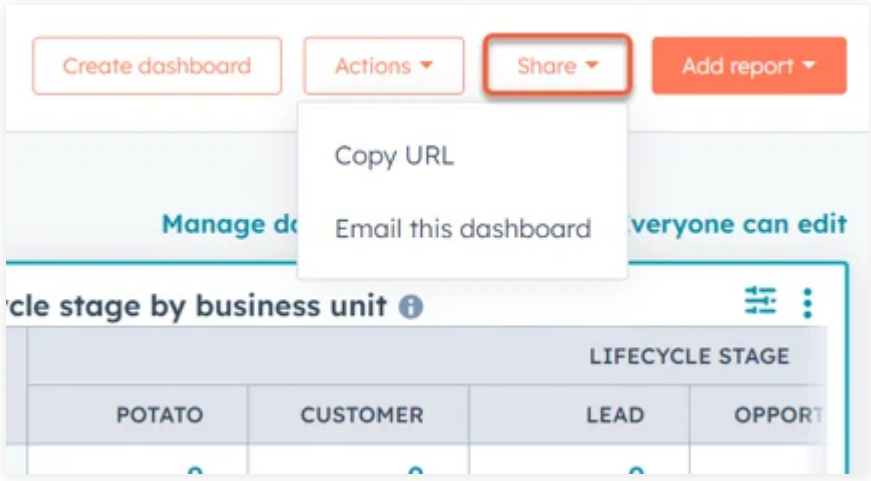

Dashboard data sent in recurring emails is based on the permissions of the user who set up the email. For users to receive their own data only, each user should set up their own recurring dashboard emails.

Please note: when sending report data as an attachment to an email the following reports aren't supported; web analytics, reports with email as the data type, annotations, custom reports, reports with unified data type, and sales analytics widget reports.

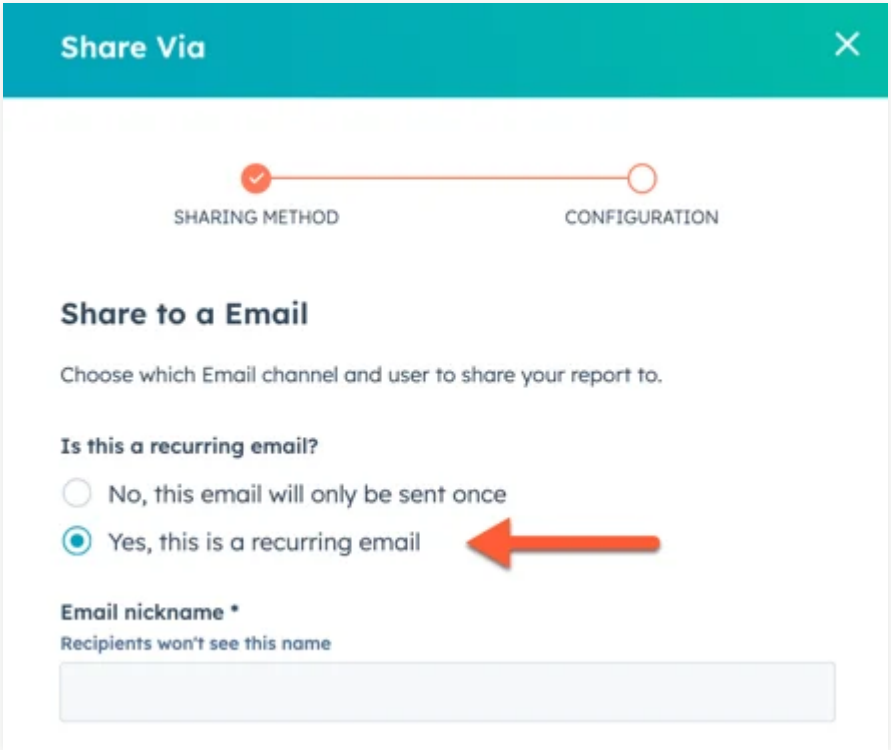

Send and schedule emails for a dashboard

Recurring dashboard emails can only be sent to HubSpot users. Non-recurring emails can be sent to both HubSpot users and non-HubSpot users. When sending a dashboard to a non-HubSpot user, the domain of the email address must be connected as an email sending domain.

1. In your HubSpot account, navigate to **Reporting > Dashboards**.
2. In the upper left, click the **name** of the current dashboard and select the **dashboard** you want to share.
3. In the upper right, click **Share**. Then, select **Email this dashboard**.

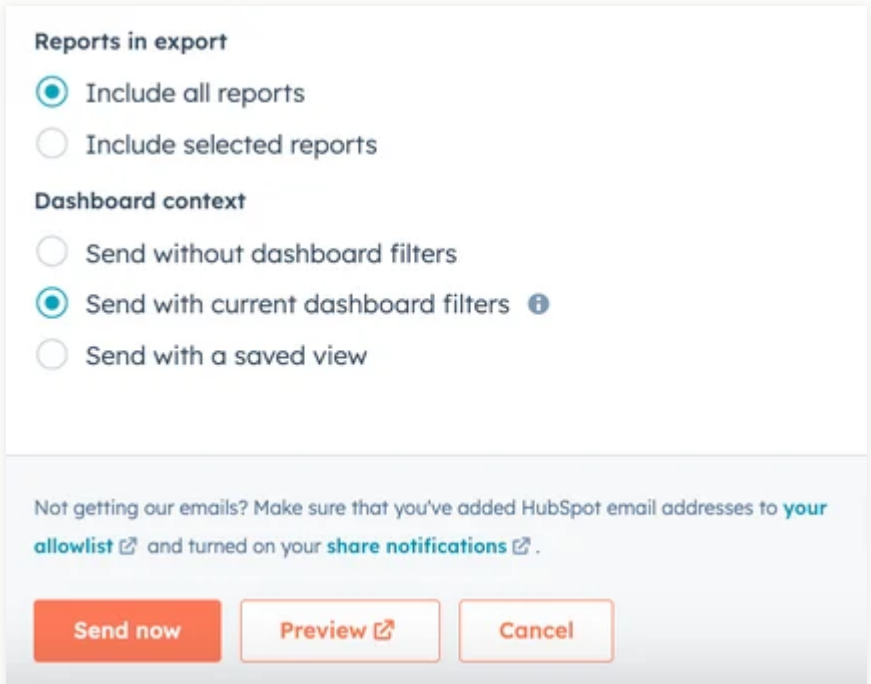

4. By default, the email will be set to send once. To send a recurring email, in the *Is this a recurring email?* section, select **Yes, this is a recurring email**.

5. Click the **Internal recipients** dropdown menu, then select the **users** to send the email to.
6. If you have a *Professional* or *Enterprise* subscription, you can send a once-off email to non-HubSpot users. In the *Other recipients* fields, enter the **recipient's email address**.
 - The domain of the email address entered must be connected as an **email sending domain**. If the email sending domain is not connected correctly, an error message will appear below the *Other recipients field*.
 - For example, if you're sending the dashboard to `test@examplecompany.com`, `examplecompany.com` should be added as an email sending domain.
 - You can send 100 emails per day to non-Hubspot users.

Please note: HubSpot and non-HubSpot users will receive the same email, please ensure that no personal or sensitive information will be shared before sending.

7. In the *Email subject* field, enter the **subject line** that'll appear in the recipient's inbox.
8. In the *Message* field, enter the **email body text**.
9. To include a downloadable file of the data as an email attachment, click the **Attach downloadable file** dropdown menu, then select a **file format**. If *No attachment* is selected, a visual of the dashboard will be emailed instead of a data file.
10. By default, the email will include all supported reports on the dashboard. To include only specific reports, select **Include selected reports**, then select the **checkboxes** next to the reports you want to include.
11. By default, the email won't include any dashboard filters. To send the email with specific dashboard filters, click **Send with current dashboard filters**.

12. To preview the report that the recipients will receive in a new tab, click **Preview**.

13. To send the email, click **Send now** or **Schedule email**.

14. If you've selected to send the email on a recurring schedule:

- Click the **Schedule** dropdown menu, then select **Daily**, **Weekly**, or **Monthly**.
- If you selected *Weekly* or *Monthly*, click the **Time of [day/month]** dropdown menu, then select the **days** or **dates** when you want the email to send out.
- Click the **Time of day** dropdown menu, then select the **time** that you want the email to send out. Report data will be captured two hours before this time.
- A summary of the email delivery dates will populate at the bottom of the panel.

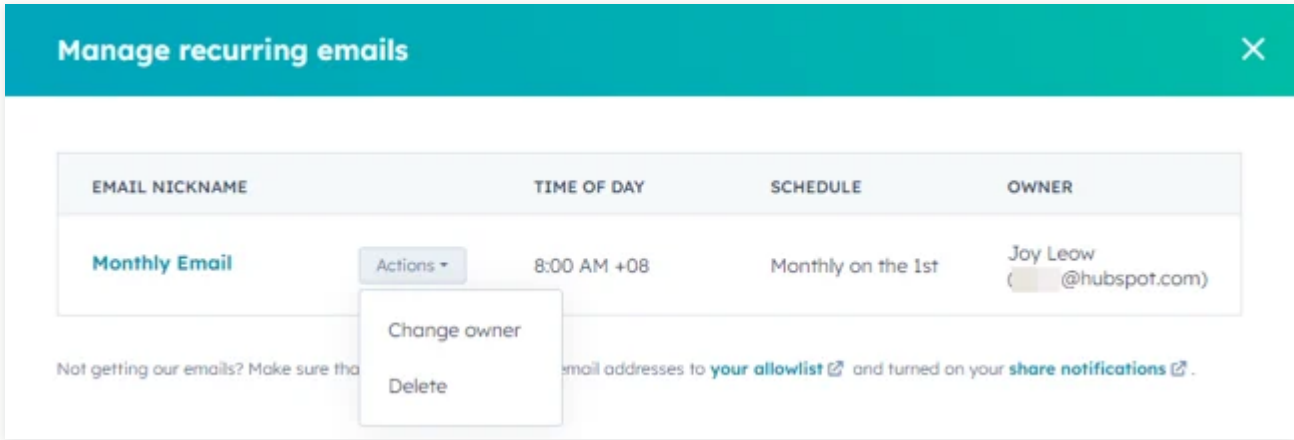

15. To finish setting up the email, click **Send now** or **Schedule email**.

Please note: only Single object, Event-based, and Customer journey reports can be sent as CSV, XLS, and XLSX by email. If a report is unsupported, the individual report's **data can be exported**.

Manage recurring dashboard emails

If you're a **Super Admin** or the owner of a dashboard, you can modify and delete a recurring email.

1. In your HubSpot account, navigate to **Reporting > Dashboards**.
2. In the upper left, click the **name** of the current dashboard and select the **dashboard** you want to edit.
3. In the upper right, click **Share**, then select **Manage recurring emails**.
4. In the dialog box, configure your recurring emails:
 - To edit the email details, click the **email nickname**.
 - To change the recurring email owner:
 - Hover over the email, then click **Actions > Change owner**.
 - In the dialog box, click the **Recurring email owner** dropdown menu, then select a new **user**.
 - Click **Change owner**.
 - To delete the recurring email:
 - Hover over the email, then click **Actions > Delete**.
 - In the dialog box, click **Delete recurring email**.

Please note: a recurring email must be deleted at least two hours before it is due to send. If it's deleted within 2 hours of its send time, the email will send to its scheduled recipients.

Share reports via the Slack integration

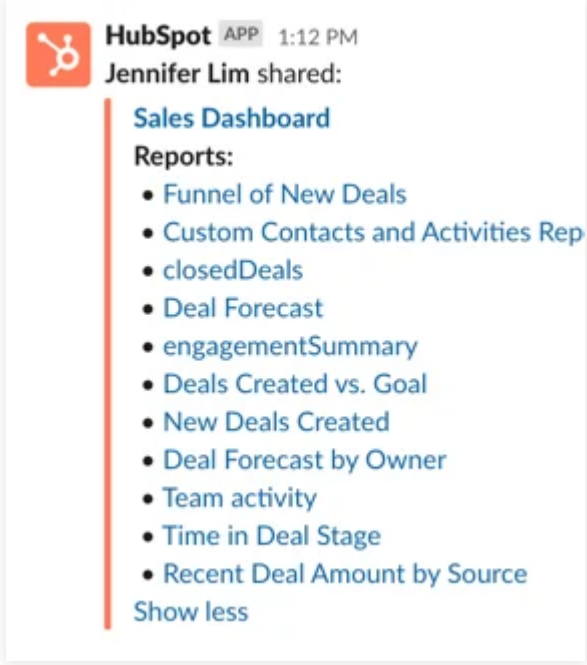

If you've installed the **Slack integration**, you can share dashboard reports with the rest of your team in Slack. Reports can only be shared to public Slack channels and cannot be sent to shared channels.

Share reports via Slack

To share a link to a dashboard's reports:

1. In your HubSpot account, navigate to **Reporting > Dashboards**.
2. In the upper right, click the **Actions** dropdown menu, then select **Share to Slack**.
3. In the right panel, select the **channel** to send the reports to. You can optionally enter a **message** to accompany the Slack message.
4. Click **Share to Slack**.

5. A preview of the reports will display in Slack. If the user has access to the report in HubSpot, they can click the link in Slack to go directly to the report.

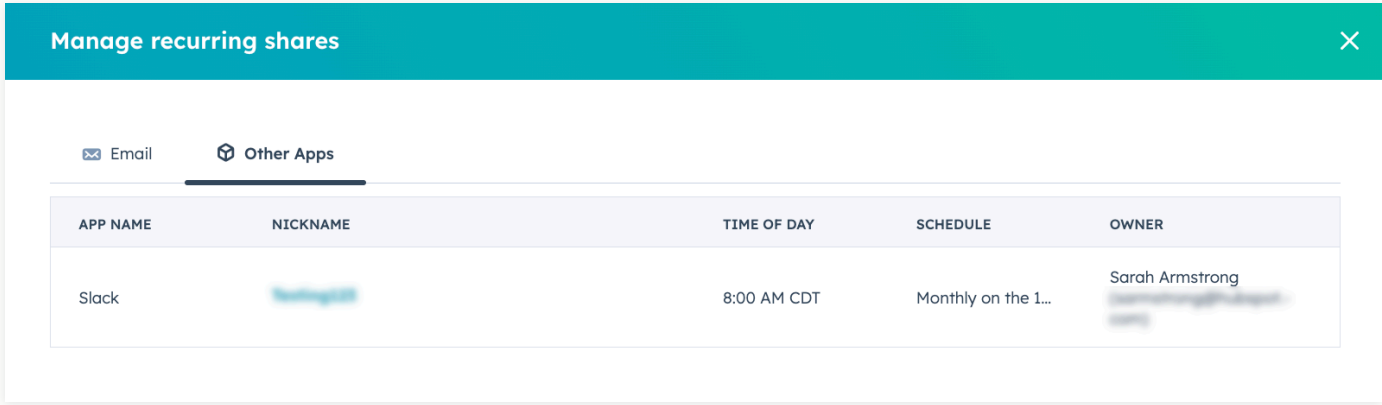

To share an individual report:

1. In your HubSpot account, navigate to **Reporting > Reports**.
2. Hover over the report you want to share and click the **Actions** dropdown menu, then select **Share via**.
3. In the right panel, click **Slack**.
4. Click **Next**.
5. By default, the email will be set to send once. To send a recurring email, in the *Is this a recurring email?* section, select **Yes, this is a recurring email**.
6. In the *Sharing to Slack channel or user?* section, select to share with a **user** or a **channel**.
7. Click the **Share to [channel/user]** dropdown menu, then select the **channel** or **user** that you want to send the Slack message to.
8. In the Message field, enter the **Slack message body text**.
9. If you've selected to send the message on a recurring schedule:
 - In the *Nickname* field, enter an **internal name** for the message.
 - Click the **Schedule** dropdown menu, then select **Daily**, **Weekly**, or **Monthly**.
 - If you selected *Weekly* or *Monthly*, click the **Day of [Week/Month]** dropdown menu, then select the **days** or **dates** when you want the email to be sent.
 - Click the **Time of day** dropdown menu, then select the **time** that you want the email to send out.
 - Report data will be captured two hours before this time.
 - A summary of the email delivery dates will populate at the bottom of the panel.
10. To preview the report that the recipient will receive in a new tab, click **Preview**.
11. To send the slack message, click **Send now**.

Manage recurring Slack messages for reports and dashboards

If you're a **Super Admin** or the owner of a dashboard, you can modify and delete a recurring message.

1. Navigate to reports or dashboards:
 - In your HubSpot account, navigate to **Reporting > Dashboards**.
 - In your HubSpot account, navigate to **Reporting > Reports**.
2. Hover over the report, then click **Actions > Share via**.
3. In the dialog box, navigate to the **Other apps** tab.

4. To change the recurring Slack message’s owner, hover over the name of the message, then click **Actions > Change owner**.
5. To edit the message details, click the **Slack nickname**.
6. To delete the recurring Slack message:

- Hover over the email, then click the **Actions** dropdown menu and select **Delete**.
- In the dialog box, click **Delete recurring message**.

Please note: a recurring email must be deleted at least two hours before it is due to send. If it's deleted within 2 hours of its send time, the email will send to its scheduled recipients.

Share reports via the Google Chat integration

Once you've installed the **Google Chat integration**, you can share reports with the rest of your team in Google Chat. You can share reports with a Google chat space or an individual user, either once or on a recurring schedule.

To share reports via Google Chat, please note the following:

- You must first **map your user between HubSpot and Google Chat**.
- You must **add the HubSpot app to the Google Chat space** you want to share the report to.

To share a report from your **report list**:

1. In your HubSpot account, navigate to **Reporting > Reports**.
2. Hover over the report you want to share and click the **Actions** dropdown menu, then select **Share via**.
3. In the right panel, click **Google Chat**.
4. Click **Next**.
5. By default, the email will be set to send once. To send a recurring email, in the *Is this a recurring message?* section, select **Yes, this is a recurring message**.
6. In the *Sharing to Google Chat space or user?* section, select to share with a **Google Chat space** or a **user**.
7. Click the **Share to [chat space/user]** dropdown menu, then select the **chat space** or **user** that you want to send the Google Chat message to.
 - In the Message field, enter the Google Chat **message body text**.
 - If you've selected to send the message on a recurring schedule:
 - In the *Nickname* field, enter an **internal name** for the message.
 - Click the **Schedule** dropdown menu, then select **Daily**, **Weekly**, or **Monthly**.
 - If you selected *Weekly* or *Monthly*, click the **Day of [Week/Month]** dropdown menu, then select the **days** or **dates** when you want the email to be sent.
 - Click the **Time of day** dropdown menu, then select the **time** that you want the email to send out.
 - Report data will be captured two hours before this time.
 - A summary of the email delivery dates will populate at the bottom of the panel.
8. To preview the report that the recipient will receive in a new tab, click **Preview**.
9. To send the message, click **Send now**.
